

# UCube™

Compact USB Digital Speakers

The most discrete, elegant and awesome all-USB speakers you've ever experienced!

#### You Want Them!

UCubes are discrete, attractive, elegant and awesome! At just three-inches square they're personal and extremely portable, ideal for home, on the desk or on the go! Available in brilliant fashion-forward colors they look as fabulous as they sound on custom brushed-aluminum stands. It's one look and "I want them!"

#### You Put Them Anywhere

Place them where convenient for vivid, focused room-filling sound. "Smart" DSP-controlled power supplies and Balanced Mode Radiator drivers are the key to their terrific sound. They're powered and receive their signal exclusively from the USB port. A minimum of cabling and no external power supply means supreme portability and vastly improved sound.

#### It's All About U

Everybody wants fast access to their personal "soundtracks." Wherever you hang, your music and movies follow! UCubes are easy, fast, fantastic-looking, convenient, portable, and create a wide stereo image so everyone enjoys the sound. You'll love them!

Move Fast.
